EXPERIENCE

Executive Software Developer
Destek Infosoltions

📅 September 2023 – Ongoing 📍 Pune, India

- As a Back-end developer, I Integrated Socket.IO into Angular and Node.js for real-time order updates and buzzer alerts, enhancing operational efficiency.
- I crafted Node.js APIs for WAAYU POS, enabling Angular web apps to seamlessly manage orders and dynamically generate carts for efficient delivery.
- Implemented Razor-pay Subscription Model for monthly billing of restaurant providers.
- Creating a marketplace Back-end using Node.js and MongoDb for vendor on boarding and direct product sales to restaurant owners.

Web and Google Apps Script Developer
Cloudfort Technologies

📅 Nov 2021 – Aug 2023 📍 Lucknow, India

- Developed a sophisticated sales application with React.js and Material UI, seamlessly integrated with Google Cloud Storage for robust data security. Tailored to optimize tax-related workflows, the app delivers a comprehensive feature set catering to both tax professionals and businesses.
- Developed a Gmail Addon to extract emails into PDF and HTML formats and save them directly to the user's designated Google Drive folder.
- Developed the Shared Drive Reports Addon for Google Sheets, with 100,000+ downloads on Google Marketplace. Proficiently utilized Drive API and Sheets API to enhance integration and data retrieval, improving productivity and decision-making. View
- Form Timer Addon: Google Forms extension for schools' online exams, preventing malicious activities. Allows customizable timers for submissions and section-specific time limits.
- Gained valuable experience in HTML, CSS, JavaScript, JQuery, React.js, Material UI and Apps Script.
- Experience Letter : View

PROJECTS

Chat App - Open AI API, Node.js, MongoDb
Personal

📅 May 2023 – Jun 2023 📍 Full Stack

- Developed a robust chat application leveraging the power of the OpenAI API, Node.js, and MongoDB to provide an immersive and seamless communication experience.
- Source Link : Github

Xero Account Management (React Js, Xero API, Node.js and MongoDb
Freelance

📅 Sep 2023 – Oct 2023 📍 Full Stack

- Built a Xero account management system using the Xero API, React.js, Node.js, and MongoDB, enabling users to fetch, edit, and download invoices. Implemented multiple user functionality for enhanced collaboration and efficiency.
- Source Link : Github

Crew Schedule Management (Node.js, MongoDb, Sheet API, Nodemailer
Freelance

📅 Dec 2023 – Jan 2024 📍 Back-end

- Created a crew schedule management app using Node.js, MongoDB, and Google Sheets API, facilitating member registration via email and seamless data transfer to Google Sheets for efficient organization and collaboration.
- Source Link : Github
